Piling

Presented by Dr Martin Larisch

At the Presentation Martin will be discussing:

- Piles in variable soft soils
- Design with negative skin friction
- Types of piles H, Timber, Concrete
- Construction testing of capacity without and with PDA

Martin is a Geotechnical, Ground Engineering, Piling, Basement, Deep Foundation, Civil Engineering and Concrete Expert with a great passion and enthusiasm for technical excellence, innovation, R&D, planning and impeccability in design, operations and execution.

Martin is also Adjunct Associate Professor at the University of Queensland and Principal Geotechnical Engineer at Golder in Queensland.
