“ Highlighting the Role of Environmental Geotechnics in Addressing Global Challenges

The 9th International Congress on Environmental Geotechnics, which is the premier conference series in Environmental Geotechnics under the Auspices of the Technical Committee “Environmental Geotechnics” (TC215) of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE), will be held on 25-28 June 2023 on the beautiful island of Crete in Greece. The conference theme “Highlighting the Role of Environmental Geotechnics in Addressing Global Challenges” will bring together international leaders in environmental geotechnics and will cover a wide range of topics that relate to advances in research and practice with a focus on safeguarding the geoenvironment, energy and resource harvesting, combating climate change and responding to natural hazards. See conference themes [here](#).

CHANIA, CRETE ISLAND, GREECE

The conference will be held in the town of Chania, a historic destination on the island of Crete in Greece. It is a place with 5,000+ years of recorded history and an environment of unique beauty. The conference venue, the Minoa Palace Resort, combines a beautiful summer resort directly on a scenic sandy beach, with state of the art conference facilities that will ensure an excellent blend of technical and social activities.
